

Treleigh Holdings Ltd

Overall and final responsibility for Environmental Management is that of.

James Gazzard

Group Managing Director

The Company Treleigh Holdings Ltd recognises its environmental responsibilities as a result of its business activities and as part of the local community is committed to minimising the environmental impact of its operations and polices.

Sound environmental management principles and practises will be applied to meet this commitment and to achieve performance objectives. These objectives will be measurable wherever practicable and progress will be monitored.

In particular, Treleigh Holdings will:

- Meet with and where appropriate exceed all relevant legislation, regulations and other requirements – where no regulations exist we will set our own exacting standards.
- We will minimise, and where possible eliminate the release of any pollutant that may cause environmental damage to the air, water, earth or its inhabitants. We will protect and wherever possible enhance habitats and biodiversity and minimise our contribution to global problems.
- We are working to reduce consumption of substances in all operations, reuse rather than dispose wherever practicable and promote recycling and the use of recycled material. Otherwise, all waste will be disposed of in a safe and responsible way.
- Promote the conservation of natural resources through the use of environmentally safe and sustainable energy sources and by monitoring our energy and water usage we will identify areas for improvement and adopt methods to improve efficiency.
- We will wherever practicable reduce emissions and wastes from manufacturing operations through efficient use and careful planning.
- We will source and promote local goods and services wherever possible. We will endeavour to deliver services that minimise adverse environmental impact. We will favour suppliers and sub-contractors who demonstrate a commitment to improving their environmental standards. We will include appropriate environmental requirements as appropriate in all sub-contracts and service agreements.
- We will ensure that vehicles operated or managed by WES Engineering Solutions are run efficiently in order to minimise the use of fuels and the production of pollutants. We will discourage non-essential mileage by staff by careful planning of journeys.
- Provide appropriate environmental training for our employees to encourage sound environmental practices.
- Assess the environmental impact of new products, processes and operations.

It is the responsibility of all employees to ensure that the Environmental Management System is adhered to ensure that environmental performance is continually improved.

This environmental policy statement is endorsed by the management team and will be reviewed annually to ensure it is achieving its objectives. Further this policy will be made freely available to all interested parties.
